

## JLG Forklift Parts

JLG Forklift Parts - Following retirement in the late 1960's, John L. Grove set out on a cross country RV voyage. After spending numerous years establishing his family built crane company with his brother, John had no idea that this journey would bring about the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision material handling technologies was the end result of a road expedition.

During their trip, John reacquainted himself with former business connections along the way. In combination with these conversations and a noteworthy event; two workers had been tragically electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John uncovered a substantial market for a product that could swiftly and safely elevate people in the air to accomplish upkeep and other building services.

After returning from their holiday, John set up a joint venture with two of his friends and bought a metal fabrication business in McConnellsburg, Pennsylvania. Starting with a small crew of twenty employees, they produced and sold their first JLG aerial work platform in 1970. The company incorporates some of the basic design essentials of that original lift into existing models.

Since then, JLG Forklifts have come a great distance from when Mr. John L. Grove came back from his fatefull cross-country trip and since the first JLG aerial platform entered the market. As of today, the company has expanded itself into quite a few international marketplaces and continues to develop modern machinery to guarantee that customers are able to become safer and more well-organized within their workplace.
