

Pulp Clamp

Pulp Clamps - There are actually several different lift truck attachments which could be used to make forklifts far more helpful. Snowplow accessories can be mounted onto the front of a lift truck. A scoop bucket could be helpful if the job requires transferring sand, gravel, soil or snow. A double block handler allows the individual operating the forklift to pick up 2 loads and pile them side-by-side. Several of those attachments are extremely excellent for light to medium tasks.

Another forklift attachment is the package lift clamp, that could carry and transfer very heavy pallets. Moreover, pallet crane forks may be utilized so as to carry and transfer pallets with an overhead crane. A drum clamp attachment is useful for transferring heavy drums from one place to another with out having to use a pallet. Lift truck mounted hoppers allow material to be moved and dumped with out having to handle it by hand. These hoppers when the bumper is released are self dumping.

There are also attachments obtainable that can transform the lift truck into a commercial mop or broom. Those attachments are perfect for cleaning boat docks, storehouse floors and parking lots. Forklift mounted platforms are available geared up with twin entry doors and can be connected in order to transport personnel from one area to another. The mounted platform accessory is ideal for reaching places which can be hard to access, particularly if you have merchandise or things stored in out of the way places or really up high.

Attachments can be a really helpful piece of equipment when put in a lift truck, changing a usual forklift right into a mobile crane unit. It is most useful when maneuvering unbalanced or tricky loads. This accessory could either be telescopic, mounted on the carriage itself, or be attached or even forklift mounted.
