

Aerial Work Platforms

Aerial Work Platforms - There are a lot of attachments designed for lift trucks that could be used to be able to help expand the capabilities of your lift truck and allow you to pick up things, handle materials with less effort or to accomplish clean-up tasks.

Some attachments were specially intended for the blades themselves. For instance, fork extensions can be used when you need a lot more fork length, which increases lifting capacity. Blade extensions come in lengths varying from 48-120 inches. Rounded or triangular accessories are another kind utilized if moving rolled material to be able to make sure it does not roll off of the traditional flat blades.

Lifting attachments can be pivoting and telescoping crane attachments. They come in many kinds. These attachments are often meant for moving lumber, metal bars, poles or whichever type of bulky items. Other accessories like for instance different kinds of hooks and hook plates are offered so as to carry stuff using a chain or sling. Slab lifters and magnetic filters are other things which can be utilized with hook attachments. Slab lifters are specialized attachments which are used for carrying various materials which are delivered in a sheet or slab format. Rug rams or carpet poles are other lifting tools which attach to your lift truck to make moving rolls of carpet a lot easier. The accessory connects onto the forklift's blades and has a pole that goes through the middle of the carpet roll.

There are various types of forklift attachment designed for facility maintenance like for example snow forks. These industrial blades can be connected to front end loaders and used for moving materials like for instance snow, dirt as well as mulch. Other common cleanup attachments include standard sweepers and magnetic sweepers. Standard sweepers comprise a broom that the lift truck blades hook onto for sweeping big spaces such as factory floors, parking lots and warehouse. The magnetic sweeper is similar except that it has a magnetic plate instead of bristles. The magnetic sweeper is utilized in areas where there is lots of metal debris like on shop floors for example. Sweepers have widths up to 60 inches and this surface area makes clean up simple and fast.

A material spreader is one more forklift attachment that is often utilized at facilities. These spreaders are handy for a variety of applications like for example spreading insecticides, seeds, ice melt, rock salt, pellets and fertilizers.

Work platforms are another optional lifting attachment that a lot of businesses utilize everyday. The platforms range in size from 36" x 36" to up to 60" x 60". There are several models accessible that are capable of folding up and storing into a smaller space. Work platforms are designed to raise workers up to an overhead location with the use of the lift truck. Larger platform models have additional space for workers in order to bring tools and other necessary things intended for the task. Often work platforms are made of steel or ploy material.
